

The brand debuts at EuroLuce with its new lighting proposals

PAD 13 - STAND G11

For the first time ever, Flaminia participates in an event dedicated to lighting and officially launches its **Flaminia Lighting** (new division). Ceramics, with its fascination and versatility, is fashioned to give life to a collection of lighting fixtures. Making an innovative use of this traditional material, Flaminia designers created highly attractive products, characterised by a rich colour choice that has always been one of the salient features of Flaminia's approach to interior design.

At the trade fair, a highly evocative exhibition space houses the new light fixtures by **Flaminia Lighting**. The environments, characterised by the dark blue-green hues used to distinguish the communication of this Division, have been designed by *Giulio Cappellini* to offer visitors an intense, immersive experience.

The earthy feel of ceramics gives the volumes a timeless beauty, the lamps become architectural elements with a strong stylistic component. The purity of **White**, the metallic depth of **Graphite** sparkle in their reflections in the glossy finishes, the tactile quality of the matte surfaces discovers a neo-retro fascination in the **Milky** hues while it reveals its glamorous soul in the **Gold** and **Platinum** colouring.

The rhythm of this emotional experience is determined by the iconic shapes of **Make-Up**, the project styled by *Paola Navone*, the pure and polished forms of **Saltodacqua**, the self-standing and ceiling mounted lamp designed by *Hsiang-Heng Hsiao* drawing inspiration from ancient eastern teacups, as well as by the light fixtures making up the **Lux** collection born of the creativity of *Patrick Norguet*, which brings to mind the atmospheres of the industrial towns of the early 20th century.
